

Complete Performance  
**Smart Versatility**

**IMAGIC Maestro**

CARDIOVASCULAR

 **KONTRON**  
MEDICAL  
an esaote group company

## A renewed concept of ultrasound:

› unparalleled completeness and modularity matched with smart versatility for wide range of use

## Modular configurations:

› every user can define a customized solution to provide a valuable answer to any clinical need

## Compactness and easy mobility:

› to fit the today user demands and provide easy transportation solutions

## Connectivity and data sharing:

› at the top of this class, an updated suite of features allow faster and safer integrated diagnoses

› Wide range of Phased Array probes, 1 MHz to 10 MHz, for adult and pediatric configuration

## The Value of Versatility:

### h<sub>hi</sub>

#### H Harmonic Imaging

› The extended bandwidth and Multiple Frequency transducers provide optimal results in terms of penetration and spatial resolution.

### af<sub>M</sub>

#### Angle-Free M-Mode

› By placing the M-mode line in any position, measurements accuracy and patient comfort are ensured.

**IMAGIC Maestro** is the latest expression of a **renewed concept of ultrasound** units presented by Kontron Medical Systems where unparalleled completeness and modularity match smart versatility for a wide range of use.

High-level of performance and features derived by the reference cardiovascular systems are the base of the innovative platform.

The **modular configurations** and the license-based architecture allow every user to define a customized solution, providing a valuable answer to any clinical need.

The main characters of the system are completed by innovative **ergonomics and design**: the extended control panel includes high performance adjustable

▶ Wide range of Linear Array probes, 3 MHz to 18 MHz

▶ Low and High frequency Microconvex Array probes, 2 MHz to 9 MHz

▶ Transesophageal probes, 3 MHz to 10 MHz, for adult and pediatric configuration

▶ Pencil Doppler probes, 2 MHz to 5 MHz

## Cardiovascular Suite for any need

### kt<sup>M</sup>

#### Kinetic Tissue Mapping

▶ Doppler based cardiac wall kinetics is easily displayed. The spectral representation allows a quantitative assessment of LV dysfunctions.

### diP ma<sup>MODE</sup>

#### Digital Imaging Process and Multi-Angle Imaging

▶ Multi-Angle Imaging and Digital Imaging Process dramatically reduce the speckle noise contribution. Pathologies structures are visualized in detail.

### ms<sup>I</sup>

#### 2D Myocardial Strain Imaging

▶ Angle-free analysis of the myocardium is done by pressing a button. Strain-Strain Rate Curves and Regional Strain Map are visualized for pathologies identification and quantification.

### qimt

#### Quality IMT

▶ RF measurement of the Intima Media is visualized in real-time; the most important parameters are included in the report for further evaluations or follow-up.

LCD, back lighted keyboard, probe and gel holders, easy-access to probe connectors and peripherals location.

Furthermore, **IMAGIC Maestro** is equipped with **K-Magic**, the innovative Kontron Medical solution able to concentrate the most used functions in one unique control key, ensuring increased exam comfort and reduced operation time.

The innovative adjustable trolley ensures **extreme compactness, adaptability and mobility** which perfectly fit the today user demands. When collapsed, it represents an easy transportation solution. Connectivity and data sharing are at the top of this class and provide an **updated suite of features** such as Real Time Archiving Capability, Large Internal Hard Disk, USB Memory Storage Ports, Integrated CD/DVD Writer. Furthermore, **IMAGIC Desk** provides an external solution to be installed on any PC, for further post-processing, measurement, data archiving and back-up.

IMAGIC Maestro provides advanced clinical solutions for **multi-purpose use**, ensuring high-level of performance, maximum compatibility for faster and safer integrated diagnoses.

### Kmagic

**K-Magic** is the innovative Kontron Medical solution combining the most used functions in one unique control key, providing exam comfort and fast operation time.

# Unlimited Connectivity Solutions

## USB

- ▶ Two USB 2.0 ports to easily export data on external devices

## CD/DVD

- ▶ Integrated CD/DVD drive to burn exam data or archive back-up

## Network

- ▶ Integrated network board to allow the system to be immediately connected to Windows® or DICOM networks

## IMAGIC desk

- ▶ IMAGIC Desk to provide an external PC solution for post-processing elaborations, measurements, data archiving and back-up.

## Printers

- ▶ Unlimited capabilities in terms of printers DICOM or Windows®, USB or network or Video signal connection

## Wireless Solutions

- ▶ The advanced platform is able to manage different wireless solutions.
